

Rijan S

A frontend-focused developer with nearly 3 years of experience building dynamic and user-centric applications using React Native, Next.js, and React.js. While specializing in frontend development, I have also gained hands-on experience with backend technologies and Django in previous roles. Currently, I am expanding my skills in backend development to transition into a full-stack developer role. Passionate about delivering high-quality solutions and collaborating on innovative projects.

Work Experience

Member of Technical Staff, Fyn Mobility

Mar 2023 - Present

- Solely maintained and managed the entire product, encompassing both frontend and backend, ensuring seamless functionality and system stability.
- Developed and maintained React Native and Next.js applications, integrating user-centric frontend features with robust backend operations.
- Worked extensively on Django's admin panel (operational dashboard), creating new modules to streamline operations and reduce manual effort.
- Maintained and monitored AWS infrastructure, ensuring optimal performance and scalability of microservices.
- Delivered critical updates and bug fixes while improving overall efficiency and minimizing operational downtime.

Junior FullStack Developer, Uplogic Technologies

Feb 2022 - Feb 2023

- Worked extensively on multiple React Native projects, contributing to feature development and bug fixes..
- Developed a React Native project from scratch, managing the complete frontend lifecycle.
- Built and enhanced React.js applications with a focus on user experience and performance.
- Collaborated with cross-functional teams to ensure seamless project delivery.
- Ensured code quality and consistency through effective reviews and optimization.

Educational Background

Bachelor of Engineering (BE), Mechanical Engineering

National Engineering College, Kovilpatti

Jun 2016 - May 2020

- Graduated with an aggregate CGPA of 7.4.
